One of the three assumptions of technical analysis is that stock prices tend to move in trends. Another way to think about this assumption is by borrowing from the world of physics and Sir Isaac Newton's laws of motion. In particular, Newton's law of motion states that an object in motion tends to stay in motion unless acted upon by an opposing force.

Technical Analysis is the forecasting of future stock market price movements based on an examination of past price movements. Like weather forecasting, technical analysis does not result in absolute predictions about the future. Instead, technical analysis can help investors anticipate what is "likely" to happen to prices over time.
